The intervention in the POET approach includes

- Setting important goals for children and their parents
- Identifying the barriers that prevent the child from achieving these goals
  - Knowledge of their problems and their effects on the child's functioning
  - Acceptance and use of tools for implementation at home
  - Guidance regarding additional factors, if any
- Emotional support for parents throughout the process
- Guiding the implementation process until success...!

Carmi Frish, Bot, MSc

POET intervention - what are its components? (in Hebrew)

Carmi Frish, Bot, MSc, 2015

Discussion of children's ADHD

- Common definitions - a framework for understanding
  - Increase understanding of core ADHD
  - Common understanding of the main symptoms
  - Recognition of various symptoms, including ADHD
  - Recognition of various symptoms, including ADHD
  - Understanding and use of tools for implementation

51% of parents who use ADHD medication are successful in ADHD treatment.

Studied children and their parents;

- 51% of parents reported ADHD treatment at home.
- There were also parents who sought treatment at various centers and clinics:
  - General Health Services
  - Private clinics
