

## Children Leisure Activity Scale for preschooler's (CLASS-Pre)

Rosenblum, Waissman, & Diamond, 2017

Dear parent,

I would appreciate your response to the following questions. First, for each activity please mark if your child performs the activity. Then, only for the activities your child does perform, please score how much your child likes the activity (1-Dislikes very much to 10-Likes very much), how often your child performs the activity, every day, once or twice a week, once a month or a few times a month and with whom your child performs the activity. If you child performs the activity during organized after school group activities, please circle the activity.

At the end of the questionnaire you may add any additional activities that were not mentioned in the questionnaire and respond in the same way you responded for the given activities.
